

1 Gary & Sandy Wittstock
237 Plantation Dr
Titusville, FL. 32780

This Koi and water lily pond measures approximately 14' X 20' with a 20' long stream winding under a bridge to their front door. Gary owns PondFather Water Features and built this feature in 2016. He used 25,000 lbs of rock and gravel to create retaining walls and cover the rubber pond liner. Their water lilies and lotus add terrific color and help create a natural ecosystem for Koi and Goldfish. A Spillway Bowl adds the sound of a waterfall and is beautiful lit up at night.

This year Gary added a Stacked Slate Sphere from Rockledge Gardens, a bubbling fountain beside their driveway. At night this fountain is lit up with changing colored lights from Red to Blue to Green and White. This kind of feature can be installed in one day.

Gary will be at this location all day to answer any questions and explain pond design techniques which he's patented.

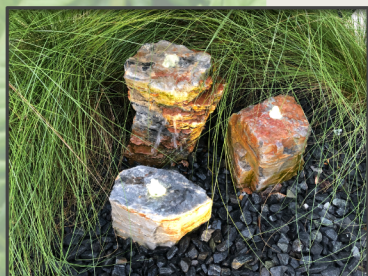

2 Chuck & Jenny Fullmer
503 Oak Cove Rd
Titusville, FL. 32780

This property is a great example of creating a beautiful water feature in a relatively small space. It is 2 years old now and was built by PondFather Water Features with an Aquascape Pro 8'X11' pond kit. The Fullmers have enjoyed having the tranquil sounds and sights of their pond just a few feet from their window and have twice visited the All Florida Koi Show in Orlando to find some beautiful Koi & goldfish.

3 Ken Parker
844 Plantation Dr
Titusville, FL. 32780

This new residence has an enhanced curb appeal from a set of 3 Aquascape Pagoda rocks installed this year by PondFather Water Features. It comes as a fountain kit manufactured by Aquascape complete with everything you need to create a great-sounding beautiful custom fountainscape. These kits are sold at Rockledge Gardens.

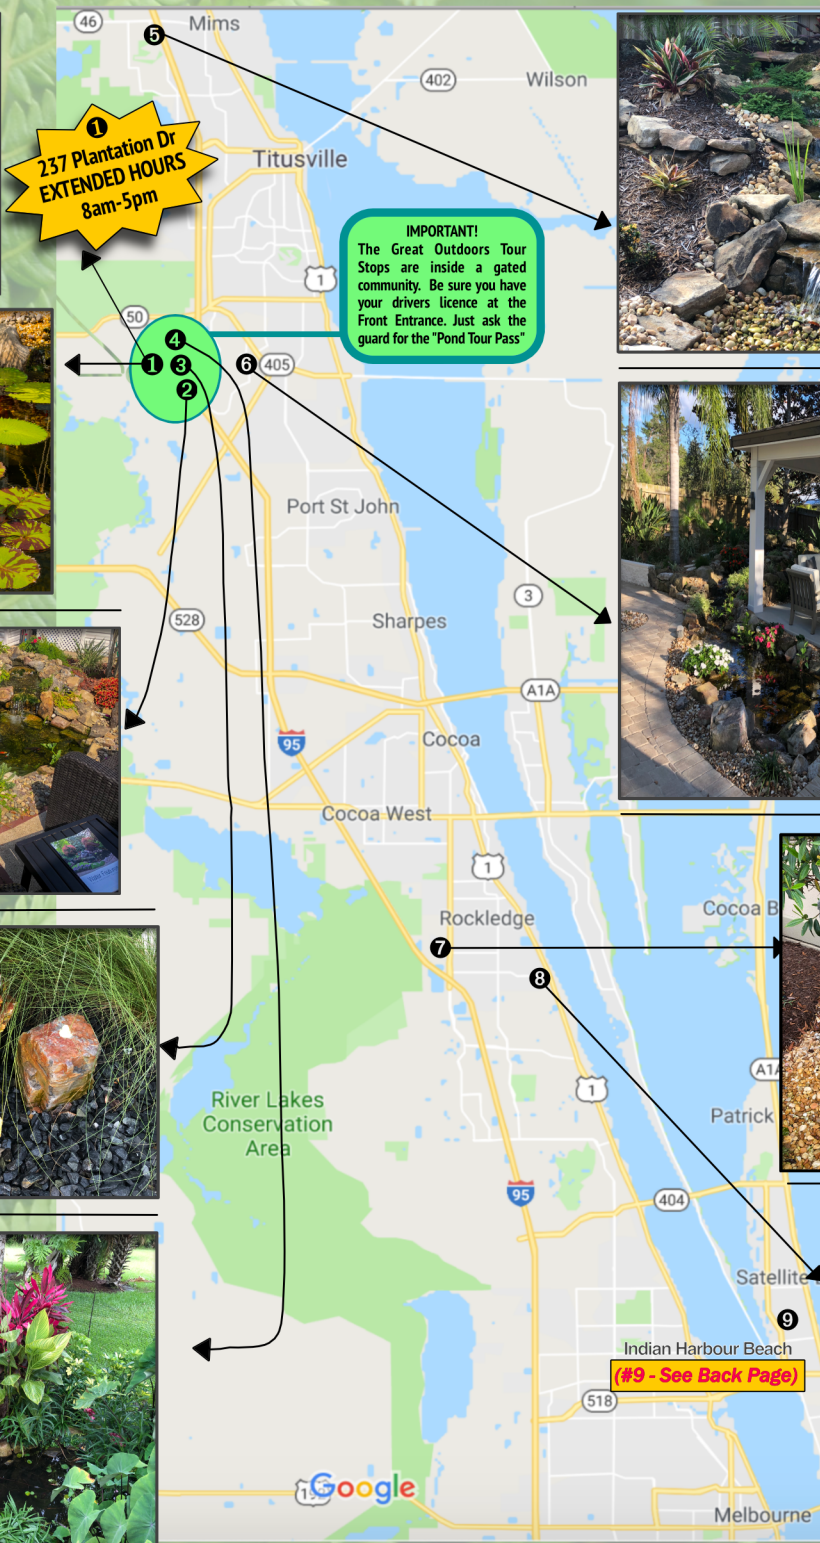

4 Dave & Bette Sibel
111 Sunset Dr
Titusville, FL. 32780

David built this pond using the Aquascape "Small Pond Kit" for this 6' X 11' two-tier pond. It's heavily planted with Taro and Canna creating a gorgeous setting & retreat in their backyard just outside their door. He used mostly small rock helping make the build less difficult and the results speak for themselves.

If your space is small or you prefer a smaller water feature don't miss this stop.

5 Josh Ebert
1965 King Richard Dr
Titusville, FL. 32796

This 10 ft long waterfall fits perfectly tucked into a corner of this yard. Listen to the wonderful sounds of cascading water, take pictures and ask yourself where this feature would fit into your own space. Built in March 2019 with Josh doing a lot of the digging.

PondFather Water Features helped design this project and provided the filters, beautiful stones, plumbing and installation expertise to make it work.

6 Chris & Sherry Connolly
6017 Barna Ave
Titusville, FL 32780

This pond measures about 6 ft wide and 12 ft long, sandwiched between their pool deck and the new concrete base for the pavilion. (They initially only wanted a waterfall - ask Chris about this). The waterfall and stream extend another 15 ft. PondFather Water Features installed a special "Vanishing-Edge" skimmer filter that holds about 300 gallons of water that has required just about Zero maintenance since the system was started up a year ago!

This is a great outdoor living space that the Connolly's decorated with the talented help of their daughter Lauren. Here's a chance to get some inspiration for your own outdoor Living the Aquascape Lifestyle!!!

7 Rev. John Britto Antony C.S.C.
St. John The Evangelist
5655 Stadium Parkway
Viera, FL 32940

This corner fountainscape was just completed in time for this churches dedication of their courtyard this spring, 2019. Father John visited Rockledge Gardens and was inspired by their water feature displays, choosing the Stacked Slate Wall 32" tall kit but with the addition of an insert to increase the total height. An Aquascape AquaBasin is the reservoir holding 99 gallons of water and it comes with the Spillway Kit.

8 Rockledge Gardens
2153 US - 1
Rockledge, FL 32955
Stocking Aquascape Retailer

Open 7 days/week with multiple ponds, fountainscapes and even a pondless display to help give you ideas for your own water feature. Gary Wittstock, P.E., The PondFather, helped build these displays in 2018 with his son, Greg Wittstock. CEO of Aquascape. Rockledge stocks extensive Aquascape products and is a fabulous garden center with 12 acres of plants, garden accessories, programs and knowledgeable staff.
